

# Creating a Group Page on Facebook on iPhone

1. Open up the Facebook app.

2. Log in to your Facebook account. Enter your email or phone number and password (in red box below). Then, click "Log In."

[Back](#)

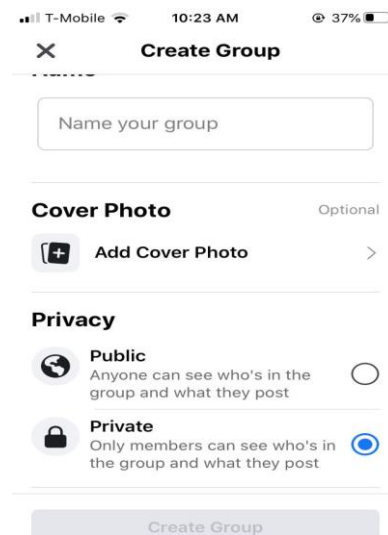

OR

[Create New Account](#)

- Next go to your settings and click on the groups tab.

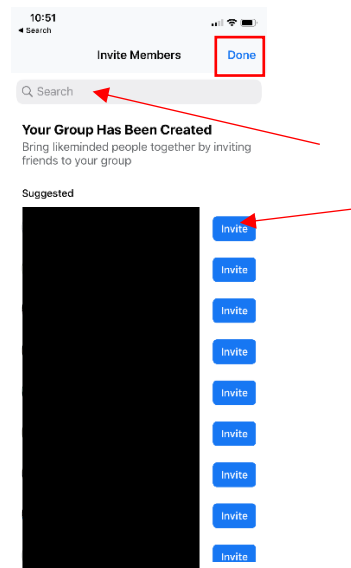

- Next, click create group and the top of the page. Here you'll also find any existing groups you're a part of or have created. Enter information about your group. For your group name, enter your building name tenant group. For example, "Smalldale Apartments Tenant Group". Then, add other folks in your tenant group by searching their names in the "Add Some People" box. Keep the privacy settings to only allow members in the group to see and post things on your page. If you would like this page to be visible to everyone, keep the "Hide Group" settings to visible. If you would only like those that you invite to the group (through the add some people option) to see the group, change this to "Hidden".

5. Next, you have several options.
  - a. Invite Friends
  - b. Personalize your group
  - c. Share Content and Hold Discussions
  - d. Go live
  - e. Plan events

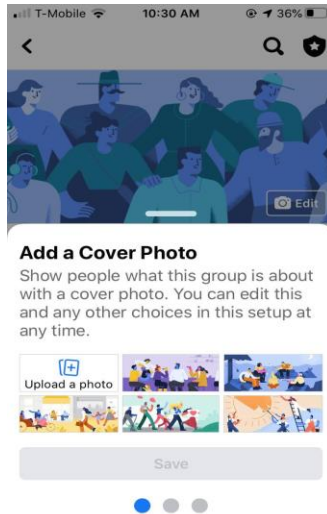

## Invite Friends

The next page after you create the group will ask you to invite friends. Search friends you would like to add in the search bar and, click the "Invite" button next to their name, then click "Done"

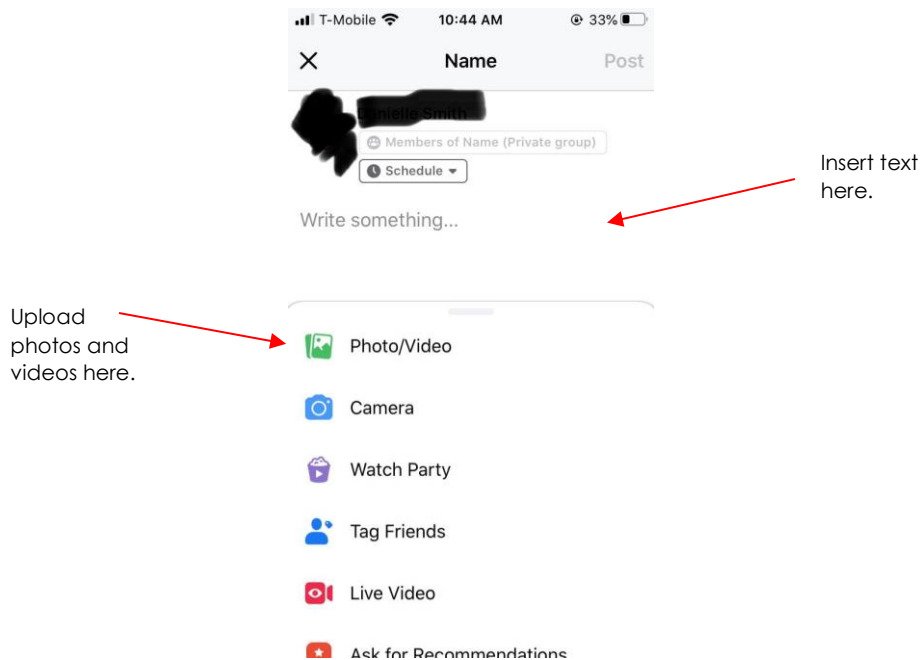

## Personalize Your Group

You can personalize your group by adding a cover photo. Click “Upload photo” or choose a photo previously uploaded to the group by clicking “Choose photo”.

## Share Content and Hold Discussions

By creating posts in the “Write something” box, these posts will be viewable by everyone in your group. Within the “Write Something” box, you have several options. You could post just text to prompt discussion or provide updates, upload a photo or video, or create a poll to gauge the group's opinion on a certain topic. When you are ready to post it to your group, click the “Post” button.

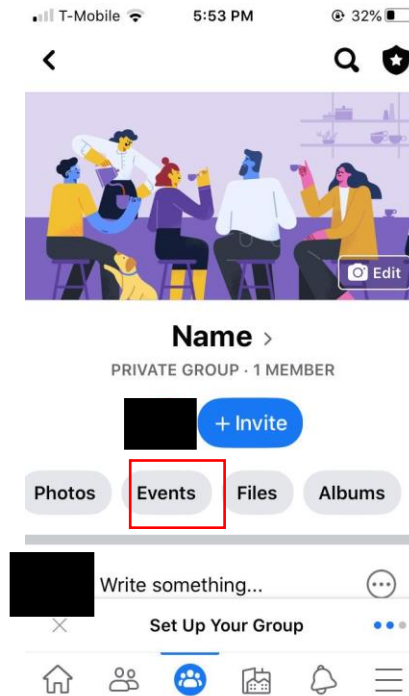

## Go Live

Going live on Facebook means you can share a video in real time to your followers. To do this, click the “Live Video” option shown in the photo above. You can start a live video by clicking “start live video,” but you also have some options to choose from such as raise money or bring a friend.

## Plan Events

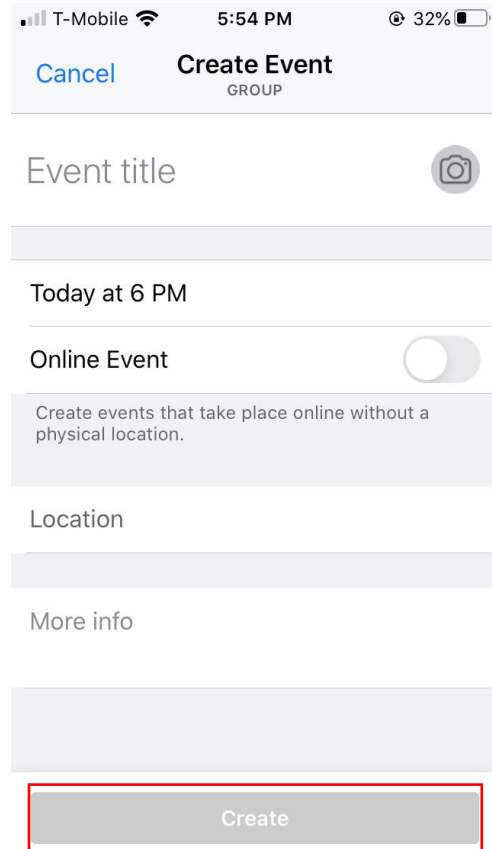

To plan an event, first click the “Events” tab.

Next, click the “Create Event” button.

You will then enter more information about your event. Include a name of the event, a location (or check “Online event” if you plan to meet virtually), and add a description. Be sure the “Invite all members of Group” is checked so everyone in your group gets a notification. When finished, click the “Create” button.

The screenshot shows a mobile application interface for creating an event. At the top, the status bar displays 'T-Mobile', signal strength, Wi-Fi, the time '5:54 PM', and a 32% battery level. Below the status bar is a header with a blue 'Cancel' button on the left and 'Create Event' in bold with 'GROUP' underneath on the right. The main form area includes: an 'Event title' field with a camera icon to its right; a date and time field set to 'Today at 6 PM'; an 'Online Event' toggle switch which is currently turned off; a descriptive text box for online events: 'Create events that take place online without a physical location.'; a 'Location' field; a 'More info' field; and a large grey 'Create' button at the bottom, which is highlighted with a red rectangular border.

## Add Additional Members

To add additional members, click on Invite at the top of the page. You'll have the option to add your friends first.
